Software Engineer with over 5 years of full-stack development experience building highly scalable frontend and backend services for a distinguished portfolio of 10+ clients, and productionizing large-scale distributed systems handling thousands of requests per and yielding millions of dollars in revenue.

Education

University of Toronto June 2020

Bachelor of Science in Computer Science (Honours) Toronto, Canada

Work Experience

Cheil Canada (Samsung) - Contract Project **Toronto, Canada**

Senior Full Stack Developer Sept 2026 - Present

- Developed a full-stack email design platform using Claude, Cursor, Python, Flask, JavaScript, and REST APIs, streamlining campaign creation through reusable content blocks, custom HTML, and live previews
- Built an AI-powered email generator using Gemini, Python, and Flask to transform prompts, reference images, and section inputs into email content, reducing manual campaign creation effort and accelerating turnaround time
- Implemented automated email rendering and quality validation workflows, integrating HTML generation, content sanitization, and automated testing with Jest and pytest to improve reliability and maintain backward compatibility

Arteria AI **Toronto, Canada**

Senior Full Stack Developer May 2024 - Feb 2026

- Architected and enhanced the core contract negotiation platform, leveraging Python, Django, React, TypeScript, Celery, PostgreSQL, Docker, AWS, and Datadog to improve functionality, reliability, and scale across repositories
- Leveraged AI-assisted development tools including Cursor, Claude, and GitHub Copilot to accelerate feature implementation, debug complex issues, generate test cases, and streamline delivery across microservices
- Designed and implemented REST APIs for contract document processing and validation, streamlining feature accessibility and boosting operational efficiency by 30%, ensuring seamless integration with existing services
- Built and enhanced React-based contract management pages, including document review workflows, search interfaces, and analytics dashboards, improving contract visibility, user collaboration, and operational insights
- Developed an asynchronous SFTP file validation system with Celery tasks, eliminating 100% of file upload errors and optimizing backend workflows for seamless data ingestion and improved processing speed
- Delivered backend capabilities for PDF rendering and conversion with Adobe PDF tools, improving document parsing accuracy, supporting multiple output formats, and ensuring consistent display across the application

Levio **Toronto, Canada**

Full Stack Developer II March 2021 - Feb 2024

- Orchestrated Kafka integration with Java Spring for a Real-Time Payments (RTP) platform, seamlessly handling over 100,000 real-time data stream transactions daily while guaranteeing data integrity and scalability
- Engineered a robust Key Management Microservice for secure inter-service communication, reducing key retrieval times by 30% and seamlessly supporting 15+ services within the RTP platform's infrastructure
- Enhanced in-house product Blue Relay. Contributed with Angular, Bootstrap, Figma, Java, PostgreSQL and Solr
- Developed a data processing chatbot with GPT API and a local vector database, safeguarding enterprise data
- Collaborated in agile development of an Angular application for a payments data platform, resulting in a 30% efficiency gain and yielding a revenue increase of over $1 million for client Fiserv
- Managed a Java-based CRM system for a client, utilised Jenkins and AWS for deployment of updates

First Derivatives **Toronto, Canada**

Software Engineer May 2018 – August 2019

- Created a Python web scraper using Selenium and LXML to extract library catalogue data from 10+ Ontario public library websites, generating CSV files for trend analysis of e-book availability, optimising catalogues
- Developed Java application for IESO, calculating spare electricity in Ontario neighbourhoods

Skills

Languages: Python, Java, TypeScript, JavaScript, HTML/CSS, C, SQL, C#, Racket, Scala

Software/Tools: Cursor, Claude, Django, Spring, Angular, React, Kafka, Bootstrap, Android, Docker, NodeJS, ExpressJS, PostgreSQL, MySQL, MongoDB, AWS, Git, GitLab, Jira, Figma
